### **SUPPLEMENTARY INFORMATION:**

**I. Abstract:** The NASA Ames Research Center, Human Systems Integration Division, manages voluntary safety reporting systems to collect and share safety information including, but not limited to, the NASA Aviation Safety Reporting System (ASRS) and the Confidential Close Call Reporting System (C3RS). Both systems are voluntary reporting systems for the reporting of

safety incidents, events, or situations. Respondents include, but are not limited to, any participant involved in safety-critical domains such as aviation or railway operations including commercial and general aviation pilots, drone operators, air traffic controllers, flight attendants, ground crews, maintenance technicians, dispatchers, train engineers, conductors, and other members of the public.

The collected safety data are used by NASA, Federal Aviation Administration (FAA), Federal Railroad Administration (FRA), and other organizations that are engaged in research and the promotion of safety. The data are used to (1) Identify deficiencies and discrepancies so that these can be remedied by appropriate authorities, (2) Support policy formulation and planning for improvements and, (3) Strengthen the foundation of human factors safety research. Respondents are not reimbursed for associated cost to provide the information.
